Circular No :- 12-13 /01

"Twinkle - Twinkle little star
How I wonder what you are ?"

Kind Attn: The Principal / School Head

Subject: Planetarium Education - K12.

Dear Sir/Madam,

Welcome to the World of **Digisky™** - Digital Mobile Planetarium Shows. We are pleased to introduce ourselves as a part of a Science consortium **SPACE**. We are a team of experienced and dedicated Planetarium Educators, Science Communicators, Science Journalists, Astronomers and IT Professionals. More than 200,000 Students from more than 200 schools (affiliated to state, national and foreign boards) from 50 odd cities in India participate in our mobile planetarium outreach programmes on regular basis. To know more log on to www.leoplanetaria.com

Digisky™ - the planetarium is a school, a theater and a cinema all rolled into one. The aim is to give easy, widespread and regular access to school students across India to the fundamental and mother of all sciences – Astronomy, which has universal reach and appeal. We take the task of igniting young minds. We bring the universe in the dome at your school.

Unlike a city's fixed public planetarium:-

- ❖ The shows are customized class wise and have been designed for students from KG (age 4 years) to class 12, keeping in mind their acumen.
- ❖ Each show is followed by a quiz where students can win attractive relevant prizes like Telescope Making Kit, Binoculars, Astro Cds, Jigsaw Puzzles, Space Cards, Sky Maps Posters, etc.
- ❖ Each participating student gets a show related booklet.
- ❖ The Shows are also supported by "Planetarium Education Support" on our website which has sections on News and Events, Teacher's Guide, Career counselling, Competitions and more.
- ❖ The school library gets one set of show booklets and quiz prizes.
- ❖ The Shows help students to relate their knowledge with real sky.

Each show is about 40 minutes long. Participation fee per student per show is Rs 160/-. For short listing of students, we provide school wise customized circulars for parents and posters for display.

We solicit for your participation. Looking forward to a long and enduring relationship with your prestigious school.

Thanking you.

Yours truly,
For Leo Planetaria
